SUMMARY

Full Stack Web Developer and UX designer with a proven ability to deliver robust, effective products in collaborative settings under strict and often tight time constraints. Always seeking personal growth, I expanded my coding acumen through a 1,000+ hour coding Bootcamp all while working full time in the maritime industry. I am now eager to tackle more complex challenges and continue my development journey utilizing the skills I've acquired to solve real-world problems.

SKILLS

- **Languages:** HTML, CSS, JavaScript
- **Frameworks:** Node.js, Express.js
- **Libraries:** React
- **Databases:** MongoDB
- **Authorization:** Bcrypt, JWT
- **CICD:** GIT

In a developer role at your company I will...

- Code within company coding standards and styles.
- Write fully automated code tests in adherence to best practices.
- Learn how to leverage the current CICD pipeline in place.
- Build responsive frontend designs to spec per the UX design.
- Build out API routes per RESTful design structure.
- Diligently prioritize multiple projects to ensure timely results.
- Be coachable and accepting of constructive criticism.

EDUCATION

V School Coding Bootcamp

Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, Node.js, React, REST APIs, and MongoDB. Created and deployed mobile-first applications while learning new languages and frameworks by collaborating every week with a senior web developer.

Remote 2022

EXPERIENCE

- **Clerk/ Quality Checker** / Virginia International Terminal **Norfolk, VA 2013 - Current**
 - o Recognized for exceptional performance, selected as 1 of 4 out of 391 total members to lead training sessions for new hires.
 - o Transfer liability of cargo and shipping containers to and from terminal.
 - o Provide proficient and clear instructions in a fast paced, high risk work environment.
 - o Facilitate transactions between shiplines and over the road logistic companies.
 - o Provide assistance to ensure that the entire operation of a vessel is executed in a timely manner. Which includes
 - o unloading, stowage, and loading of said vessel.
 - o Identify and apply correct placards to hazardous cargo.
 - o Record time worked by terminal longshoremen and prepare appropriate timesheets.
 - o Proficient in N4, a Kaleris product. Kaleris is a database entry program used to organize and catalog cargo and shipping containers.

PROJECTS

Sou Servant.

Virginia Beach, VA 2023-Present

Throw that old recipe binder away. Sou Servant allows admin users with the ability to access and manage the entire restaurant menu, including the capability to add, edit, and delete items. In building this web-based application, I displayed a working knowledge of HTML, CSS, JavaScript, React.js, Node.js, MongoDB, JWT, and RESTful methods to develop frontend design, client-side validations, and the API framework.

- Constructed API following RESTful standards, deploying the tool in a CICD pipeline through Github
- Addressed authentication and security concerns with JWT tokens, and the Bcrypt library.
- Created accessible, dynamic, and responsive front-end design using HTML wireframes, CSS styling, and eloquent JavaScript.

Mock Surf Ecommerce Store

Virginia Beach, VA 2023-Present

Developed a platform enabling users to browse, select, and purchase items. In building this web-based application, I displayed a working knowledge of HTML, CSS, JavaScript, React.JS, Node.JS, MongoDB, and RESTful methods to develop frontend design, client-side validations, and the API framework.

- Constructed API following RESTful standards, deploying the tool in a CICD pipeline through Github
- Created accessible, dynamic, and responsive front-end design using HTML wireframes, CSS styling, and eloquent JavaScript.
